Glenmore Christian Academy Earns Tech-Ready School Certification from Protect Young Eyes

We are thrilled to announce that Glenmore Christian Academy has officially earned the Tech-Ready School Certification from *Protect Young Eyes*, a national leader in digital safety education. This important milestone reflects our commitment to creating a secure, informed, and balanced digital environment for our students, staff, and families.

The Tech-Ready Certification evaluates schools on six key areas: informed parents, clear tech policies, strong tech systems, confident staff, prepared students, and thoughtful use of educational technology. Over the past several months, our team has worked diligently to meet these standards by hosting digital safety workshops, reviewing and updating policies, investing in tech infrastructure, and training our educators in best practices.

Being a Tech-Ready School means that we don't just use technology — we use it *wisely*. We prepare students to navigate the digital world safely and responsibly, and we equip families to be engaged digital mentors at home.

We are grateful to our entire school community — parents, staff, and students — for their support throughout this process. Special thanks to the team at Protect Young Eyes for their guidance and for helping us strengthen our culture of digital citizenship.

At GCA, we believe that a safe online experience is essential to every child's learning and well-being. This certification is not the end of our journey, but a strong step forward in preparing our students for a connected world.
